## **Core Data Services Portfolio Updates**

Expanded & Improved AFA's

Hyperconverged and Rack Scale

Major Customer Adoption with Content Portfolio

Application-aware Data Center
Analytics

#### Recent Introductions

Hitachi Enterprise Cloud w/ VMware

Policy-driven IT Automation

Hitachi Content Platform 8.0

Hitachi Content Intelligence

Converged Infrastructure Systems (UCP CI)

Converged Automation (UCP Advisor 2.0)

#### **TODAY**

IoT Appliance

Hitachi Enterprise Cloud for Containers

Smart Data Center Services

Smart Data Center aaS

Analytics and Automation SaaS

Next-Generation Cloud Object Store

#### **Coming Soon**

New Scale-up Compute

**Next-Generation VSP** 

Expanded NVMe Portfolio

Software Defined Infrastructure

LEADER

## Hitachi Virtual Storage Platform

- Advancements in 2017
  - VSP F Series flat service models and flexible configurations
  - Continued SVOS Adaptive Data Reduction enhancements
- Coming in 2018...
  - 7.6TB & 15TB SSDs
  - Encrypting FMDs
  - Storage management Improvements
  - New Models

**Common Management** 

**Common Operating System** 

#### What Comes NEXT...

#### **2018** NEW MODELS

- 2x MORE PERFORMANCE
- LOWER LATENCY
- REDUCTION IN DEPLOYMENT TIME
- HIGHER CAPACITY & DENSITY

#### **OPTIMIZATION**

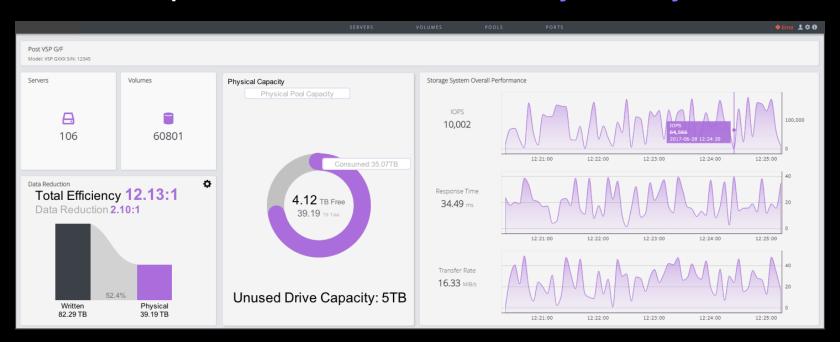

- ENHANCED DATA REDUCTION FEATURES
- SIMPLIFIED DEPLOYMENT & CONFIGURATION
- SVP-LESS AND VM SVP OPTIONS

#### What Comes NEXT...

# **Available Anywhere: HTML5 40% Faster Set-up Time**

# No external management server Runs natively on the system

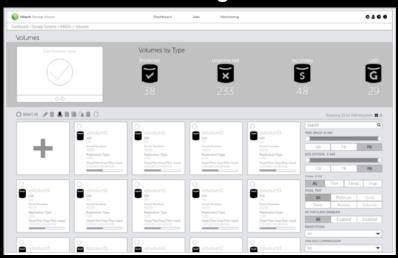

## Hitachi Storage Advisor: 2018 Enhancements

#### SIMPLE, FEDERATED STORAGE ENVIRONMENT MANAGEMENT

#### **Volume Migration**

#### **GAD Provisioning**

#### **iSCSI Support**

## **Building the Future of Storage**

# SOFTWARE-DEFINED STORAGE

Block SDS

Commodity Hardware

SVOS Data Services Hybrid Cloud Workloads

# NVMe BUILDING BLOCKS

NVMe in Hyperconverged: Caching today, more tomorrow

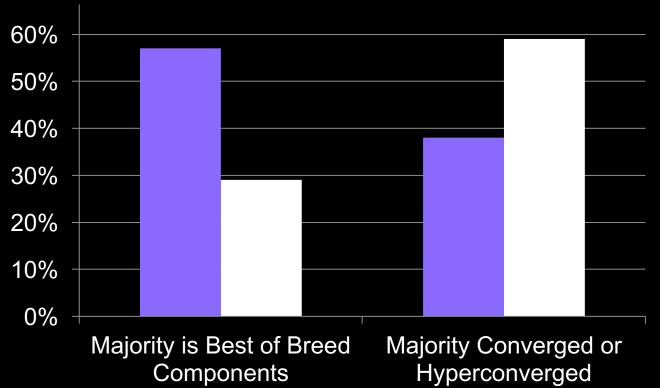

NVMe back-end:
VSP Optimization, shelves for SDS

**NVMe over Fabric**Array, cache and HCIS connectivity

Automated: Hitachi Unified Compute Platform Advisor 2.0

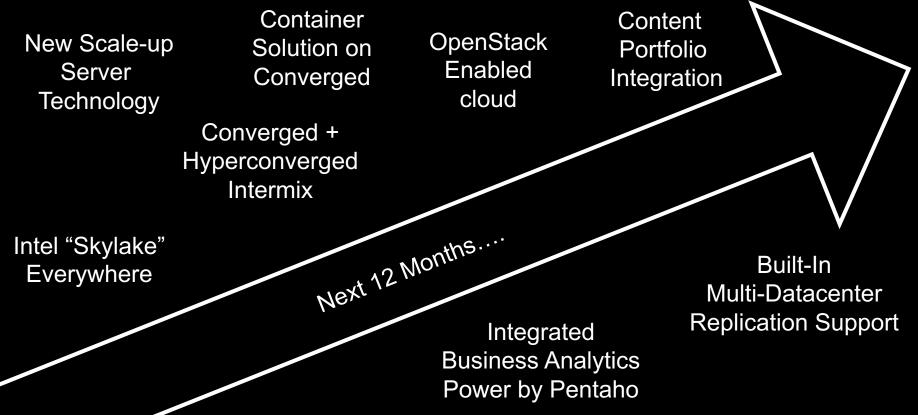

# Introducing The New UCP Advisor

### What Comes NEXT...

## **Hitachi Solutions and Converged Portfolio**

Business-relevant IT solutions with new analytics and IoT capabilities

Hyperconverged systems targeted at agile, scale-out workloads

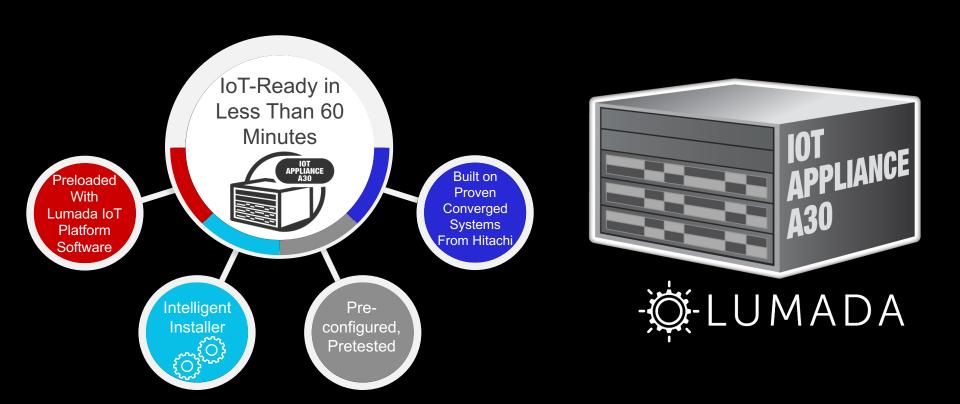

Development of portfolio-wide automation and APIs

Scale-up (>8 sockets) solutions targeting inmemory applications

## Hitachi IoT Appliance, Powered By Lumada

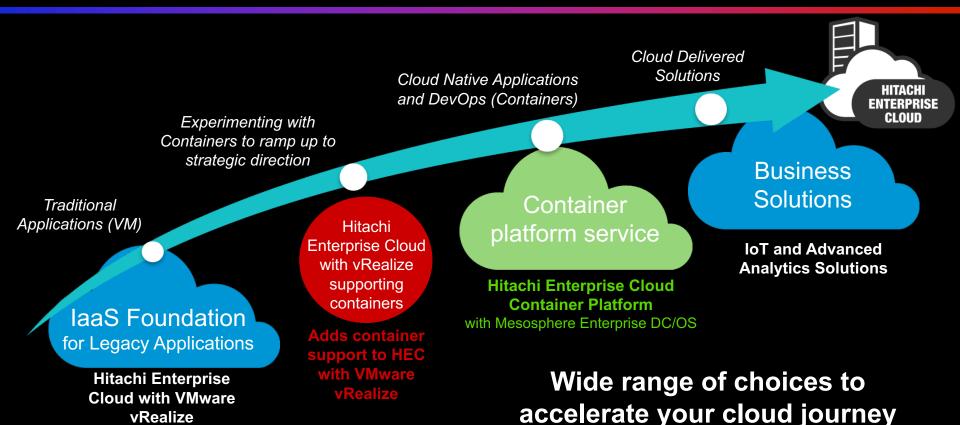

## An Expanding Hitachi Cloud Portfolio

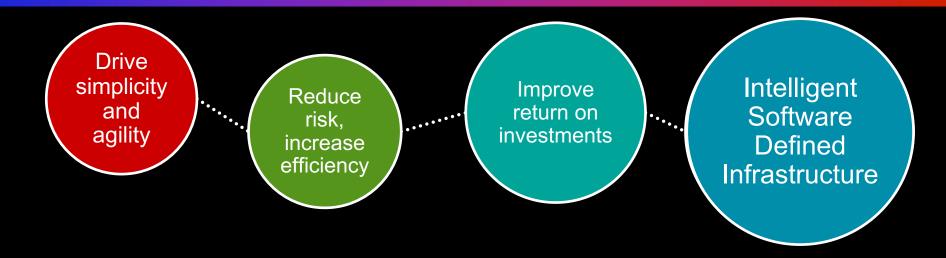

vRealize

## The Automation Imperative

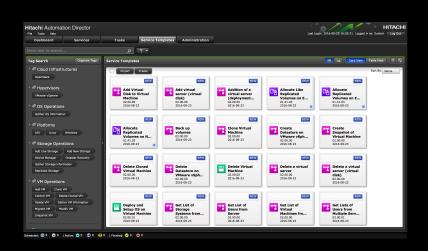

In 2017, automation will not be optional. Every data center will need to embrace Gartner Every data center will need to embrace automation in order to improve agility and deliver digital business value. Oct 2016, Doc ID: G00309661

## The Technology Behind Smart Data Center

#### **HOW To Automate**

#### HITACHI AUTOMATION DIRECTOR

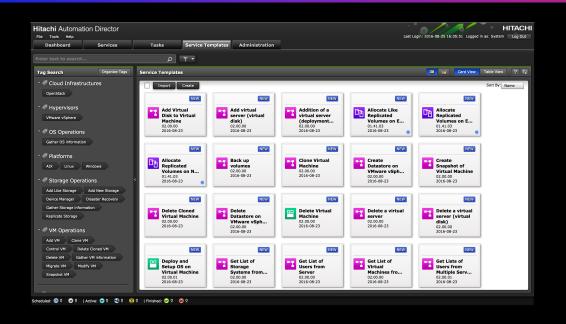

### **Knowing WHAT to Automate**

# HITACHI INFRASTRUCTURE ANALYTICS ADVISOR

#### **Hitachi Automation Director Accelerating Your Datacenter Automation**

**Reduce Manual Processes by** 90%

**Dramatically Reduce Human Errors** 

Redirect Resources for Strategic Projects

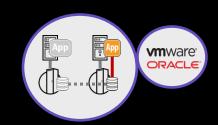

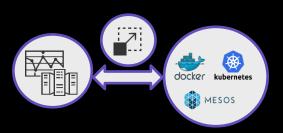

#### What Comes NEXT...

- Integration across Hitachi analytics, copy management, storage management, Pentaho
  - Policy based application-aware provisioning, protection, migration, preemptive failover
  - Bare metal provisioning, patch management, container deployment, ESX cluster deployment
- Data Center-wide 3<sup>rd</sup> Party support
- And more templates to simply repetitive tasks

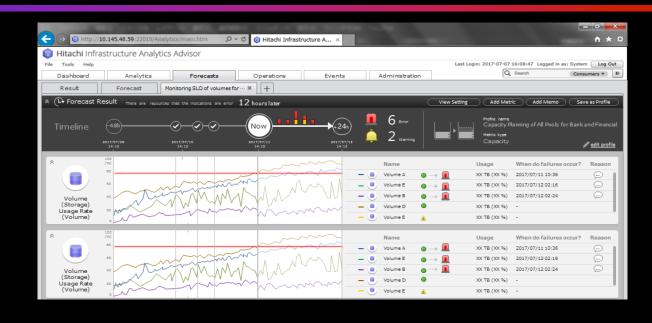

## Hitachi Infrastructure Analytics Advisor

Optimize physical and virtual machine performance

Ensure adherence to service level agreements

Minimize downtime & future resource planning

Solution Layer

Hypervisor Layer

Network Layer Storage Layer

## IT Analytics How And Where You Want It

#### **Today**

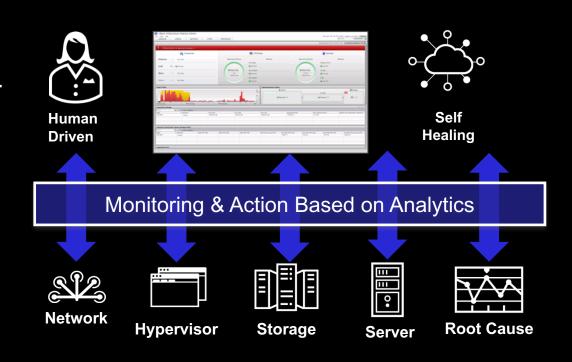

## Integrated IT Analytics and Automation

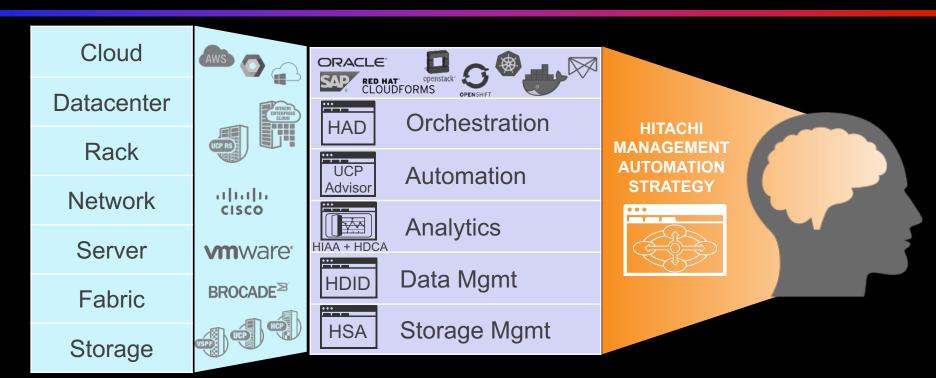

New operational intelligence and automation enables your IT environment to adjust to changes dynamically.

- Self-healing infrastructure
- Application-aware SLA management
- 90% faster resource delivery
